

2C Evaluate a solution for reasonableness

- Rachel bought 5 video games that cost \$15.25 each. Which is a reasonable cost for the 5 games, before tax is added?
 - Between \$90 and \$100
 - Between \$80 and \$90
 - Between \$70 and \$80
 - Less than \$70
- Sue bought 3 posters. The prices ranged from \$10 to \$15. Before tax is added, which is a reasonable cost for the 3 posters?
 - More than \$45
 - Between \$40 and \$45
 - Between \$35 and \$40
 - Between \$30 and \$35
- Mr. Sanchez owns about 203 square miles of farm land. There are 640 acres in one square mile. Which is a reasonable number of acres of farm land Mr. Sanchez owns?
 - Less than 1000 acres
 - Between 1000 and 10,000 acres
 - Between 10,000 and 100,000 acres
 - Between 100,000 and 1,000,000 acres
- Justin wants to buy a skateboard that costs \$149.95, including tax. He has saved \$91. Which is the best estimate of how much more money Justin needs to save to buy the skateboard?
 - \$40
 - \$50
 - \$60
 - \$70
